AARON J JACOB

SOFTWARE DEVELOPMENT | PYTHON · FASTAPI · REACT · SQL

Navi Mumbai, Maharashtra | +91 91676 94437 | aaronjacob9820@gmail.com
github.com/AaronJJacob2007 | LinkedIn | CaseBridge live demo

PROFILE

Second-year B.E. Computer Engineering student (CGPA 9.79/10) with hands-on experience developing Python and JavaScript applications, building FastAPI REST endpoints and integrating SQL databases. Built a deployed React/FastAPI/PostgreSQL prototype with automated tests, implemented JWT-based authentication, and integrated the Gemini API into an academic assistant. Seeking software development or backend engineering internship opportunities.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Java, C
Backend & Web: FastAPI, REST APIs, SQLAlchemy, JWT authentication, React, Vite, Streamlit, Gemini API
Databases & Tools: PostgreSQL, MySQL, SQLite, Git, GitHub, Docker Compose, pytest, unittest, VS Code

PROJECTS

CASEBRIDGE | Deployed full-stack case coordination prototype (SIH 2026) | Code | Demo
Python · FastAPI · SQLAlchemy · PostgreSQL · React · Docker Compose · pytest

- Built REST APIs, SQLAlchemy models, and a React interface for case registration, status changes, and cross-bureau coordination with persistent PostgreSQL data.
- Implemented role-restricted writes, audit history, deterministic record matching, and repeated-request safeguards against synthetic records.
- Verified 214 backend tests, 44 frontend checks, and live UI-to-API-to-database persistence across refreshes.

DYSLEXIS | Reading-support web application with backend authentication
Python · FastAPI · React · SQLAlchemy · JWT · Alembic

- Implemented user registration/login, consent-aware activity storage, practice APIs, and data export/deletion flows; added database migrations and 26 isolated backend tests.

AI SEMESTER COMPANION | Interactive academic assistant | Code
Python · Streamlit · Gemini API · Input validation

- Built AI-assisted tutoring, quizzes, notes, and study-planning features with API integration, environment-based configuration, and error handling.

DUNGEONCRAFT | Three-member Python/MySQL mini-project
Python · MySQL · OOP · Desktop UI · Automated tests

- Co-developed modular game logic and SQL-backed save/load operations; tested database persistence and desktop controller behaviour.

EDUCATION

Fr. Conceicao Rodrigues Institute of Technology (FCRIT), Vashi | B.E. Computer Engineering
2025–2029 (expected) | CGPA: 9.79/10 | Coursework: Data Structures, DBMS, OOP, Python Programming

LEADERSHIP & CERTIFICATIONS

Technical Coordinator, AI & Deep Learning Club, FCRIT | Jun 2026–Present; led an 80-minute hands-on Python/OpenCV workshop using public starter code.
NPTEL: Foundations of Deep Learning (Elite) | Cisco Networking Academy: Introduction to Cybersecurity
